

Appn. No: 09/035,936 Bernardy GAU 3671 Amendment B 2001 Feb. 14 p.10

disk body and forming thereby an opening through the disk body that is radially outwardly of the juncture;

said segment having an inclined leading edge with cutting teeth on the edge for cutting in the direction of the rotation and as a result of the angular orientation of the blades, said teeth presenting laterally extended cutting section from a face view and laterally extended cutting section from an edge view of the disk.

17

16  
58. A brush cutting blade as defined in claim ~~57~~, wherein at least three segments are provided in said disk body, and said juncture inclined from trailing end to leading end radially inward.

18

16  
59. A brush cutting blade as defined in claim ~~57~~, wherein multiple segments are provided symmetrically around the disk body, the segments deflected outwardly at a similar angle between approximately 45° and 80°.

**Remarks:**

Applicant has now fully complied with the Examiner's recommendations in the writing of claims. Applicant has further incorporated the claims of US Patent 5,875,700, to the extend allowed by the Examiner, for purpose of Interference.

Very respectfully,

*Eckhard Bernardy* ✓
